

# KOSH

After more than 10 years experimenting in the studio, Kosh is one of the few upcoming Moroccan producers to keep an eye on. It's during his years in the U.S. that his interest in early acid tracks and Detroit electro truly matured. His involvement with the Orlando underground scene allowed him to further his passion for the American sound and sharpen his skills. That is, his music delicately blends nasty acid basslines, frenetic electro beats, and warm Detroit infused pads.

Now back to his hometown Casablanca, he has been closely collaborating with Casa Voyager, setting the tone with 2 tracks on the label's first VA. His debut solo EP released in January on the label has been critically acclaimed and is a floor-filler played by notable artists around the globe.
